AR – RWA Free Trade Agreement

This is to confirm the participation of all 7 Autonomous Regions in our first FREE TRADE AGREEMENT (FTA's) which will cover both tokenization and insurance wraps on its assets. The purpose is to generate the initial valuation only and not to identify the trading partners yet.

The FTAs will cover precious metals and avatar data.

Upon approval with the relevant international bodies, our participating FO's will provide 20% of the value of the FTA's to initiate the liquidity in selected exchanges which carry specific stablecoin or RWA algorithms to enforce the RWA currency backing. Any form of trades will undergo strict authentication procedures as part of KYC.

Due to the implementation of the FTA's, the UK entity will continually serve as an SPV and the program will work based on legal frameworks and licenses signed in their Autonomous Regions (AR's).

We have received confirmation from our councils of their support to generate the initial valuation of assets pledged by the participating AR's with our Universal Basic Income (UBI) obtaining 50% of any proceeds as a dividend for humanity. Recipients have exceeded expectations worldwide on the educational process, ecosystem development and community use encompassing the tokenization of individual and corporate assets.

The next FTA valuation will be generated as the 10th Central Bank Agreement is signed and will then commence the latch-on to the payment systems identified. Please be guided accordingly.

Sincerely

Paul Monozca
